

INDEX

(Page numbers in *italics* indicate tables or figures.)

- Aborigines, 41-42
- Accountability in education (Britain), 200
- Ambidexterity, 28. *See also* Handedness
- Animal research on brain asymmetry, 24, 26
- Aphasia, 3; recovery from 25
- Asymmetry: biochemical, 24; development of, 25-26; drug effects and brain, 24-25; at the microscopic level, 23, 25; normal brain, 23-24; sex hormones and brain, 24, 25, 29, 30
- Autoimmune disease, 29
- Bachelor's degree, dyslexics' time to earn, 125, 134
- Barat College: screening of applicants to, 152; testing program for degree candidates at, 144
- Belanger, J. F., 143, 154
- Bettleheim, B., 39-40
- Blair, T. K., 147
- Bowman Gray School of Medicine, 6, 7
- Brain: asymmetries of, 23-26, 30; blood flow changes in, 46; developmental and growth stages of, 35-36, 43, 46; experimental and observational research with lesions of, 24, 25-28, 30; language functions and, 4, 23, 25, 27-28, 29; left planum, 23; mapping areas of, 4; reading and writing ability and, 5; relative weights of the, 3-4; senses and, 36-37; speech region of the, 23; testosterone and development of, 25, 29, 30
- Broca, P., 3
- Broca's area of the brain, 23
- Case reports, apparent conflict with experimental studies, 80
- Catecholamine activity, asymmetries in, 24
- Celiac disease, 29
- Cerebral blood flow, 46-48
- Childs, S., 189, 190
- Code-breaking skill, reading and, 74
- Colitis, 29
- College students: syntactic complexity of learning-disabled, 139; writing of learning-disabled, 139, 141-42, 152-54
- Columbia-Presbyterian Medical Center, 10
- Communication, nonverbal, 39-40
- Compensation in dyslexics, 16, 21, 28, 31, 194
- Comprehension strategies to be taught, 85
- Computers, 153, 154
- Concepts: number that can be handled at one time, 38-39; sounds and, 39
- Contextual information and effects: text-level comprehension and, 79, 86; word recognition and, 78-81, 86
- Corpus striatum, chemical symmetries in, 24
- Critchley, M., 191
- Crohn's disease, 29
- Cross-modality, 37
- Crump, W. D., 143, 145, 147
- CSDS. *See* Syntactic density scoring correction
- Cunningham, A., 80-81
- Darwin, C., 41-42
- Data, contradictory, 68
- Dean Learning Center (Dallas), 192, 193, 194, 195
- Dean, W. B., 192
- Debray, F., 22
- Debray-Ritzen, P., 22
- Decoding skills. *See* Word decoding
- de Hirsch, K., 9-11
- Dejerine, J., 5
- Deprivation, making up for, 42. *See also* Disadvantaged children

- Developmental dyslexia: associations with medical illnesses, 21, 29; brain asymmetry and, 23-26; neuroanatomical alterations found in, 26-28. *See also* Dyslexia; Dyslexics
- Developmental lag, 113, 115
- Developmental research, 24, 25-26, 29, 30
- Diagnosis, importance of early, 42, 192
- Diagnostic Evaluation of Expository Paragraphs (DEEP), 141
- Diagnostic tests, predictive battery of, 10-11
- Disadvantaged children, 37
- Drug effects, asymmetry and, 24
- Dyslexia: definition of, 22, 53, 191; disabilities and skills and, 15-16, 21, 28, 31, 194; familial, 26-27, 29-30; hormonal basis of, 5; importance of early diagnosis and treatment, 42, 192; incidence of, 22; neuroanatomical antecedents of, 14; treatment of, 14. *See also* Developmental dyslexia; Reading disabilities
- Dyslexics: brains of, 26, 27-20; college majors of, 128-29; desire to keep things simple, 61; educational attainments of selected, 125-29; educational program for (in North Wales), 199-207; extra competencies and talents of, 15-16, 21, 28, 31, 194; fear of failure and, 62; future of, 13-16; immunological disorders in, 29-30; left-handedness in, 28, 29-30; matching things accurately and, 60; occupational choices of selected, 130-31; personality studies of, 52; processing of symbolic information by, 63; remedial and teaching techniques for, 83, 188, 191-92, 195-96, 205-206; research information needed about, 47-48; transduction of visual information into auditory information by, 48. *See also* A Follow-up study of dyslexic boys; Gow School
- Early reading problems. *See* Longitudinal study of children with early reading problems
- East Texas State University, 192
- Educational attainment: of selected dyslexic men, 125-29; variables predictive of, 125-28
- Educational therapists, demand for, 214. *See also* Tutors
- Educational topics, media reporting of, 73
- Eisley, L., 41-42
- English as a second language, 192
- Evidence, principle of converging, 69
- Experimental studies, conflict between case reports and, 80
- Eye movements, 72
- Familial influences. *See* Genetic Factors
- Feeman, D., 80-81
- Fitch, G., 4
- Flying High (computer self-instructional program), 153
- Follow-up study of dyslexic boys: educational outcomes and, 124-29; methods used, 118-19; occupational outcomes and, 130-31; results of, 119-33
- Fox, B., 74
- Galaburda, A. M., 5
- Genetic factors, 26-27, 29-30, 31, 131-32
- Geshwind, N., xi, 4, 5, 46
- Gillingham, A., 187-88, 189-90
- Gillingham techniques, 188, 189, 190
- Gilman School (Baltimore), 118; alumni of, 125-33
- Goldman-Rakic, P., 26, 28
- Goldman, S., 79-80
- Golub, L. S., 142, 143
- Goodman, K., 78-79, 80
- Gow School (South Wales, N.Y.), 117; students and alumni of, 119-24, 125-33
- Grammar, logic and, 40-41
- Grapheme-phoneme conversion, 75
- Gray Oral Reading Test, 104-105, 109, 110, 115, 126, 127
- Greenhill School (Dallas), 192-93
- Gregg, K. N., 141, 153
- Hall, R. G.: recipient of Samuel T. Orton Award for 1984, xiii-xvi; response in accepting, xvi-xviii
- Hammill, D., 140
- Handedness, 122, 123, 124; immune dis-

- orders and, 29. *See also* Asymmetry; Left-handers; Right-handers
- Harper and Row Linguistic Science Readers, 105
- Head Start programs, cognitive effects and, 36
- Heredity. *See* Genetic factors
- High-interest/low-vocabulary readers, 105
- Hitzig, E., 4
- The Hockaday School (Dallas), 190
- Hogaboam, T., 79-80
- Hunt, E., 77
- Hunt, K. W., 140, 142
- Immunological disorders: in dyslexics, 26, 29, 30; handedness and, 29
- Information, ability to analyze, 35
- Ingvar, D. H., 46
- Instruction-dependent neural networks, 43-44
- Intelligent behavior, 35
- Inventory of Written Expression (Pot-eet), 140
- Iowa Silent Reading Test (ISRT), 111
- Iowa Tests of Basic Skills (ITBS), 100, 103, 105, 113
- ISRT. *See* Iowa Silent Reading Test (ISRT)
- ITBS. *See* Iowa Tests of Basic Skills (ITBS)
- Jackson, M., 77
- Jansky, J., 11
- Job performance, traits important to good, 131
- Jobs Clearinghouse, 215
- Kemper, T. L., 5
- Kidder, C., 142, 143
- Knasel, E. G., 52
- Kottmeyer Diagnostic Spelling Test, 104
- Language-learning, 39-41; ineptitude, 13. *See also* Therapy and teaching
- Larsen, S., 140
- Late bloomers, 114
- Learning, 43; age and, 36, 42, 46; to read, 47
- Learning disabilities: communication network for professionals about, 210; screening professionals in the field of, 212
- Learning-disabled (LD) adults: services and resources for, 210; written expressive language disorders of, 138
- Learning-disabled (LD) children, memory and, 82-83. *See also* Special education programs in public schools
- Left-handed writing, 122, 124
- Left-handers: brain symmetry in, 24; dyslexia and, 29; immunological disorders and, 29
- Levinson, H., 73
- Linguistic awareness: comprehension deficits and, 84; at the phoneme level, 74
- Linguistic patterns in writing, 139
- Linguistic structures, thought and, 153
- Listening, reading and, 83-85
- Logic: language and grammar and, 40-41; rules and assumptions of, 42; very young child and, 46
- Longitudinal study of children with early reading problems: findings of, 105-113; procedures used in, 100-105; tests given in, 104-105
- McClelland, J., 77
- McGill-Franzen, A., 141, 145
- Marshall, J., 73
- Media other than print, learning through, 114, 116
- Memory: deficits and reading, 76, 81; reading and short-term, 67, 81-83
- Merrill Linguistic Readers, 105
- Metalinguistic awareness, 148
- Microcomputers: possible uses for, 154; self-instructional course and, 153
- Migraine, 29
- Minimal terminal unit for analyzing syntax, 140-44
- Moran, M. R., 141-42, 145
- Morgan, W. P., 5
- Morris, N. T., 143, 145
- Multimodality, 37-38. *See also* Cross-modality
